

## Trainee Exchange Program After Sales Service Engineer

Kennziffer: 69.2022

### What we offer:

Ecoclean is a globally operating supplier of technology for industrial parts cleaning. Our products are engineered in Germany, our machines are delivered and operated worldwide. We strive to improve our global services performance and are looking for motivated people to strengthen the international cooperation with our local entities. Therefore, we will set-up a Trainee Program, which offers a great opportunity to start a new career at Ecoclean to enter the world of industrial cleaning industry. The position will be within our After Sales responsible for the installation, maintenance and on-site as well as remote support of our international customers.

### First period:

- You will start with a detailed Onboarding Program in our Center of Competence in Filderstadt, Germany and work in all relevant departments to understand the technology of our machines
- You will join an experienced Ecoclean Service Engineer in the field for training on installations, maintenance and repair jobs to strengthen your practical skills and technical knowledge
- You will work with our technical specialists in the back office to remotely resolve challenging trouble shootings
- You will get familiar with colleagues, processes and procedures in our Center of Competence

### Second period:

- You will move to our USA entity in Southfield, Detroit, MI for a long-term exchange program
- You will support the daily service business with our customers in the USA as well as in Mexico
- You will encourage the development of the local organization and structure with your network and knowledge from the Center of Competence

### Your Profile:

- You are a highly motivated and self-driven personality
- You like to travel and explore different cultures
- You are addicted to technology and like challenging machine design
- You want to become an expert in a field for a globally growing industry
- You have successfully finished a technical apprenticeship and a university degree (Bachelor or Master)
